## 🎓 EDUCATION

---

**The Australian National University**, Canberra, Australia 07/2021 – Present

*Doctor of Philosophy - Hydrology and Remote Sensing*

**The Australian National University**, Canberra, Australia 07/2018 – 08/2020

*Master of Environment (Advanced)*

**Southwest University**, Chongqing, China 09/2014 – 06/2018

*Bachelor of Land Resources Management*

## 👛 EXPERIENCES

---

**CSIRO Agriculture and Food**, Canberra, Australia 08/2021 – Present

*PhD Postgraduate Student* Supervisor: Dr. Brendan P. Malone

Academic collaboration with The Australian National University. The key responsibilities include:

- Committing to industry-aligned projects that address interdisciplinary challenges in agricultural innovation and soil science using statistical approaches and high-performance computing (HPC) resources.
- Establishing the geo-database using data from in-situ measurement, drone, satellite, and proximal observations, as well as the Soil and Landscape Grids of Australia, to enable spatiotemporal modelling of soil water dynamics for key growing regions in Australia.
- Performing assigned research tasks and producing scientific publications that demonstrated practical implications for the agri-food sector.

**ANU Fenner School of Environment & Society**, Canberra, Australia 07/2022 – 11/2022

*Academic Tutor* Supervisor: Assoc. Prof. Franklin P. Mills

Course: ENV53020 Climate Change: Science, Society, and Policy

- Developed and implemented course plans and study materials that effectively communicated complex scientific concepts. Responded to students' questions and marked assignments and exams.
- Helped students understand the basic scientific concepts behind climate change using a variety of visual aids and real-world examples. Guided students to explore the impact of climate change on different regions and populations, as well as to examine the various policy options available for addressing the issue.

**ANU Institute for Water Futures**, Canberra, Australia 01/2021 – 01/2022

*Research Officer* Supervisor: Dr. Luigi J. Renzullo

- Processed continental-scale remote sensing data and earth observations acquired from various satellite platforms. Demonstrated expert-level spatial analysis skills using R and Python.
- Proficient with essential Linux commands and utilised programming modules from the ANU HPC platform (i.e., the Gadi supercomputer) to complete research tasks.
- Undertook testing and statistical analysis as required. Prepared and disseminated relevant analysis reports to internal and external stakeholders, including external funding agencies.
- Participated in workshops and professional networks across campus to develop a broad base of industry knowledge, and provided input to improve the area's research practices and processes.

**UniLodge Australia**, Canberra, Australia 02/2020 – Present

*Senior Resident*

Key skills acquired: Emotional Intelligence, Collaboration, Leadership, Self Care, Time Management.

- Acted as a residential leader who is front-liner in delivering pastoral care to university students on campus.

- Responded timely to first-aid emergencies, fire drills and evacuations; Responsible for immediate referral to the relevant emergency body.
- Organised lodge events and actively committed to an inclusive community; Provided mental health advice and personal assistance to residents on the assigned floor through regular catch-ups.

## JOURNAL ARTICLES

---

## THESES

---

- [1] **Yu, Y.**, 2024. Role of land surface temperature in improving spatiotemporal predictability of soil moisture-related stress in vegetation, PhD Thesis, The Australian National University, Canberra. *In Preparation*.
- [2] **Yu, Y.**, 2020. An Assessment of Outmigration-related Land Use Transition in Rural Area and Corresponding Social and Ecological Dynamics - A Case Study in Southwest China, Masters Thesis, The Australian National University, Canberra. <https://doi.org/10.25911/5fabaffa0e0e9>.

## REVIEW ACTIVITIES

---

- **Remote Sensing of Environment** (Student Reviewer, 2022)

## ★ HONOURS & AWARDS

---

- ANU University Research Scholarship (2021 - 2024)
- ANU-CSIRO Digital Agriculture PhD Supplementary Scholarship (2021 - 2025)
- ANU UniLodge Residential Scholarship (2020, 2023)

## **i SKILLS & CERTIFICATES**

---

- **Programming Languages:** R Programming (Expert); Python (Advanced); Shell Scripting
- **Platform & Software Packages:** High Performance Computing (NCI & CSIRO); Google Earth Engine; GitHub; ArcGIS; EndNote; LaTeX
- **Certificates:** First Aid Certificate; Youth Mental Health First Aider
